

Sept 2011

You are precious
in my eyes.

Dear Nigel

Over the summer two technicians from Western spent a week at Our Lady's installing a new wireless network across school and increasing the number of landline points. As always they were both professional and flexible and completed the work with little disruption to the building or staff. Before leaving the premises they ensured that all machines were accessing the network and provided a written overview of passwords and necessary procedures.

We are now using the network which is impacting greatly upon children's learning. Not only has the connection speed increased but access in all areas of the school is now possible; a first!

Over the past eight years as Head teacher I have used your service, purchasing hardware, software and technical support. All aspects of this service have been excellent; you know our system and have provided support when we have needed it. Thank you.

Yours sincerely

Miss J Hornby
